

Have I Got A Girl For You!

So I released the images taken at our corporate photo shoot today. What you see above was one of the pictures that made the final cut. Thanks to all who left positive comments. We agree... we think they turned out fairly well. Thank you to [Stephen Flint Photography](#) who worked with us throughout the process.

Seeing the picture, I couldn't help but reflect on the passage of time. This past April, my wife and I celebrated our 26th year of marriage. Here's what we looked like in our "infancy."

Personally, I think we look better today than we did back then. But then again, photo retouching has come a long way since those days.

Still, digging out this old wedding photo reminded me that it almost didn't happen. I think I [blogged](#) about how I met my future wife while doing a play in Orlando. We were cast opposite each other. She caught my eye immediately. What I didn't know at the time was that I also caught hers... just not in the way I would have wanted. She shared with me much later that she tried to set me up with a girlfriend of hers. Apparently I was good enough for a friend... but I didn't quite exceed past that bar. At least not at the start.

Fortunately I was too obtuse to pick up on the hints that she wanted to introduce me to someone. Sometimes being unaware works out for you. What did Forrest Gump say? "Stupid is as stupid does." I'll take that kind of stupid every day because

sometime during the long rehearsal period I must have grown on her. She eventually stopped dropping the hints about getting together with some “friends” and just decided to spend time with me.

Personally, I think she made a good decision but I can't speak for her. (Well, I could but I've learned not to – stupid is as stupid does, remember?)

Michael Ondrasik and Home Video Studio specialize in the preservation of family memories through the digitalization of film, videotapes, audio recordings, photos, negatives and slides. For more information, call 352-735-8550 or visit our [website](#).
